

ReliaG® Pro Series

# MODEL 2568

Direct Screw Drive  
Garage Door Opener

ALWAYS AT YOUR COMMAND

Featuring 1/2 HP Motor

## Highlights

- **Durable Performance** – AC motor combined with patented direct screw drive rail provides power for operating residential sectional doors up to 500 lbs. and up to 10' high (8' high for one-piece doors).
- **Maintenance-Free Direct Drive System** – Self-lubricating screw drive rail requires no maintenance under normal operating conditions. The screw drive steel rod connects directly to the motor, eliminating the need for a gearbox normally used on chain or belt models (fewer parts mean less chance of a breakdown in the future).
- **Assembled in the U.S.A.**
- **Dependability** – The quality built into a Model 2568 is backed by a 15-year Limited Warranty<sup>◇</sup> for the motor and Limited Lifetime Warranty for the screw drive rail.
- **Smart Illumination Lighting** – The 2-bulb system positions the light toward the inside of the garage instead of on the door for light where you need it most.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year. Shouldn't you have one in your garage?  
Genie — Always at Your Command!

<sup>◇</sup> Limited non-transferable warranty. See Operation & Maintenance manual for details.

## Features & Benefits

### POWER & CONTROL

**AC Motor** – The AC motor provides all the power needed to deliver top performance for opening and closing your garage door when you need it.

**Screw Drive Design** – Patented direct screw drive rail offers strong lifting force. This design also increases reliability by eliminating the gearbox necessary for belt & chain models. Fewer parts mean less chance for potential breakdown in the future.

**C-Channel Rail** – Strong rail design helps promote durability & safety. Also conceals the screw drive rod for better appearance.

**Speed** – The powerhead has an opening speed of 7.0 inches/second\* to get you on your way fast.

### SAFETY

**Safe-T-Beam® Non-Contact Reversing System** – When objects pass through the infrared beam, the garage door automatically stops closing & reverses open without having to make physical contact with the door.

### SECURITY

**Intellicode® Access Security System** – Genie's superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

**Sure-Lock™ Control** – Allows you to lock out remote controls & wireless keypad at any time for increased security – also known as a vacation lock. (Included with IntelliG and basic wall consoles.)

### CONVENIENCE

**Smart Illumination** – Light is positioned to the inside of the garage instead of the door for light where it's needed most. When the opener is activated, the light will stay on for four minutes, giving you ample time to get to your house or vehicle. The lighting is compatible with incandescent (60 watts maximum) & most CFL and LED light bulbs.

**Auto Seek Dual Frequency** – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

**Pre-Programmed Remote** – Ready to use out-of-the-box with simple steps to change the programming if so desired.

**HomeLink® & Car2U® Compatibility** – Works with current & ALL previous versions of HomeLink or Car2U.

#### Genie Professional Line Ratings

**TriloG® Pro Series** ★★★★★

**IntelliG® Pro Series** ★★★★

**ReliaG® Pro Series** ★★★

\* +/- 0.5 inches per second. Speed will slow with one-piece doors.  
 ◇ Limited non-transferable warranty. See Operation & Maintenance manual for details.

## Convenience Features

*Put more magic in your Genie opener with these great accessories!*

### Wireless Keypad

Mounts outside your door to give you keypad code access to your garage, which is great when you are outside without the remote control. Back-lit keypad lets you easily see the numbers & allows you to control up to three openers.

Choose a color for the flip-open cover that best complements your home.

### 1-Button Remote

If the remote only needs to operate one opener, you may want our simple, easy-to-use one-button remote. Also features Auto Seek Dual Frequency just as the standard 3-button remote does.

### GenieMaster® Remote

This versatile remote control works with all Genie gated community receivers as well as most Genie openers ever made, including Genie 390 MHz remotes on 9-switch, 12-switch, and 9-switch trinary formats. It also is compatible with those models that have Auto Seek Dual Frequency.

### 6' Power Cord (2568H)

Genie openers come with a standard 4' power cord. However, if you need a couple extra feet for harder to reach outlets, then you want our 6' power cord Model 2568H.
